Summary

I am currently a second-year student at Father Conceicao Rodrigues College Of Engineering Bandra, passionate about exploring new technologies, particularly in data science and web development. I enjoy building innovative projects in my free time, which allows me to apply my skills and deepen my understanding of these fields. Additionally, I also sketch as a hobby.

Education

Father Conceicao Rodrigues College Of Engineering
B.E(Computer Engineering) | 07/2027
Cgpa - 9.5

Internship

Front End Development Intern

TripValue – *Mumbai*

Jan 2025 – March 2025

- Developed dynamic and responsive frontend features using **React**, enhancing user experience and interface interactivity.
- Contributed to backend development with **Node.js** and **Express**, working on API integration and server-side logic.
- Collaborated with the development team to debug, test, and optimize both frontend and backend components.
- Gained hands-on experience in full-stack development, version control (Git), and RESTful API design.

Hackathons

1.Auraflix Hackathon – 1st Place Winner

Full Stack Developer · Team of 4 · March 2025

- Built **InfluenceIQ**, a platform revolutionizing influencer marketing with a custom **Credibility Score**, LLM-powered influencer matching, and **ML-based trend forecasting** up to 9 months ahead.
- Overcame Instagram API limitations by designing a **custom backend API using Kaggle datasets** to simulate live influencer data.
- Developed the **FAST API backend**, focusing on API creation and seamless integration with a dynamic **React frontend**.
- Delivered a polished product within 3 days, collaborating under tight deadlines in a fast-paced virtual hackathon.
- Hosted by **Auraverse** · [Project on Devfolio](#)

2.Smart India Hackathon (SIH) – Internal Round Qualifier

Full Stack Developer – Team of 6

2024

- Developed the **backend using Django**, crafting robust APIs and handling server-side logic to support a dynamic, React-based frontend.
- Played a key role in **integrating the backend with the frontend**, ensuring seamless functionality and real-time data flow.
- Collaborated in a high-pressure, competitive environment to deliver a complete and polished web solution, which led our team to qualify for the **prestigious internal round of SIH**.
- Gained valuable experience in full-stack development, teamwork, and building under real-world constraints.

Projects

1.Restaurant Booking System And Event Management System

Built a full-featured Table Booking and Event Registration platform for a restaurant, designed to enhance the customer experience and streamline operations.

- Let users book tables easily and register for events, with a **queuing system** in place when seats were full.
- Integrated **QR code check-ins** for quick and easy event entry.
- Added a **VR-powered view** of the restaurant layout to help guests explore the space before booking.

- Developed a **secure login and registration system**, handling authentication and user management on the backend.
- Created an interactive **chatbot** to assist users with bookings, event details, and general queries.
- Showcased the **restaurant's menu and chefs** in a visually engaging way.
- Built a **review system** where guests could leave feedback and read others' experiences.

Tech Stack

- **Backend** - Django
- **Frontend** - React
- **Database:** SQLite
- **Tools:** Git, GitHub
- **VR** - aframe
- **Styling** - Tailwind

2. Gamified Learning App For Law

Developed an interactive website aimed at increasing public awareness about the Constitution through engaging and educational tools.

- Created a **quiz app**, **study material section**, and a **law chatbot** to help users learn about legal concepts interactively.
- Delivered **daily news updates** and **on-this-day historical facts** featuring notable legal events or figures.
- Developed **law-themed games** including:
 - **Ludo with a legal twist** to make learning fun.
 - **Law Wordle** focused on legal terms.
 - A **choice-based court case simulator** where users make decisions as judges/lawyers and then see the real-life verdict.
- Ensured consistent **user engagement** through fresh content, games, and interactive learning tools.

Tech Stack:

- **Backend:** Django
- **Frontend:** Django Template Language (DTL), HTML, CSS, JavaScript
- **Database:** SQLite
- **Tools:** Git, GitHub

3. Image To VR

Developed an App that lets you view a 360 degree image in VR view in your web browser on mobile and desktop

Tech Stack

- **Frontend** - React
- **Backend/Database** - Firebase
- **VR** - aframe
- **Hosted on GitHub**

Skills

Skills

- **Languages & Web Technologies:** HTML, CSS, JavaScript, SQL, Tailwind CSS
- **Frontend:** React, Context API, Fetch API, Responsive Design
- **Backend:** Django, Django REST Framework, Node.js, Express, RESTful API Development, Authentication & Authorization (JWT, Sessions)
- **Database:** MySQL, MongoDB, CRUD Operations
- **Tools & Platforms:** Git, GitHub, Render, Vercel
- **Data Analysis:** Pandas, NumPy, Matplotlib, Data Visualization, Jupyter Notebook
- **Other Skills:** Problem-Solving, Debugging, Team Collaboration, Leadership
