Education

Bachelor Computer Engineering,

2023 – 2027

Father Conceicao Rodrigues College Of Engineering

CGPA - 9.5

Professional Experience

Frontend Development Intern, Trip Value

01/2025 – 03/2025

- Developed dynamic and responsive frontend features using React, enhancing user experience and interface interactivity.
- Contributed to backend development with Node.js and Express, working on API integration and server-side logic.
- Collaborated with the development team to debug, test, and optimize both frontend and backend components.
- Gained hands-on experience in full-stack development, version control (Git), and RESTful API design.

Projects

Restaurant Booking System

- Developed a seamless table-booking and event-registration system with queuing for full-capacity and QR code check-ins
- Integrated a VR-powered restaurant layout preview for immersive pre-visit exploration
- Engineered a secure authentication and user-management backend
- Created an interactive chatbot to handle bookings, event inquiries, and general support
- Designed a visually engaging menu & chef showcase and built a guest review platform

Text To VR Image Converter

- Website [🔗](#)
- Developed a web app named “Text To VR Image Converter” that let user type prompt or upload image to get a 360° VR picture
- Added in-browser VR view on mobile and desktop, so user can swipe, click, or tilt device to look around
- Built a simple UI to switch between AI image generation and manual upload modes easily

Achievements

First Place At AuraFlix Hackathon
